GNU AFFERO GENERAL PUBLIC LICENSE

Version 3, 19 November 2007

Copyright © 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU Affero General Public License is a free, copyleft license for software and other kinds of works, specifically designed to ensure cooperation with the community in the case of network server software.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, our General Public Licenses are intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

Developers that use our General Public Licenses protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License which gives you legal permission to copy, distribute and/or modify the software.

A secondary benefit of defending all users' freedom is that improvements made in alternate versions of the program, if they receive widespread use, become available for other developers to incorporate. Many developers of free software are heartened and encouraged by the resulting cooperation. However, in the case of software used on network servers, this result may fail to come about. The GNU General Public License permits making a modified version and letting the public access it on a server without ever releasing its source code to the public.

The GNU Affero General Public License is designed specifically to ensure that, in such cases, the modified source code becomes available to the community. It requires the operator of a network server to provide the

source code of the modified version running there to the users of that server. Therefore, public use of a modified version, on a publicly accessible server, gives the public access to the source code of the modified version.

An older license, called the Affero General Public License and published by Affero, was designed to accomplish similar goals. This is a different license, not a version of the Affero GPL, but Affero has released a new version of the Affero GPL which permits relicensing under this license.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU Affero General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the

work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

- a) The work must carry prominent notices stating that you modified it, and giving a relevant date.
- b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

- c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.
- d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

- a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.
- b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.
- c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.
- d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.
- e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued

functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

- a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or
- b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or
- c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or
- d) Limiting the use for publicity purposes of names of licensors or authors of the material; or
- e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or
- f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Remote Network Interaction; Use with the GNU General Public License.

Notwithstanding any other provision of this License, if you modify the Program, your modified version must prominently offer all users interacting with it remotely through a computer network (if your version supports such interaction) an opportunity to receive the Corresponding Source of your version by providing access to the Corresponding Source from a network server at no charge, through some standard or customary means of facilitating copying of software. This Corresponding Source shall include the Corresponding Source for any work covered by version 3 of the GNU General Public License that is incorporated pursuant to the following paragraph.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the work with which it is combined will remain governed by version 3 of the GNU General Public License.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU Affero General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU Affero General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU Affero General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU Affero General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
    <one line to give the program's name and a brief idea of what it does.>
    Copyright (C) <year>  <name of author>

    This program is free software: you can redistribute it and/or modify
    it under the terms of the GNU Affero General Public License as
    published by the Free Software Foundation, either version 3 of the
    License, or (at your option) any later version.

    This program is distributed in the hope that it will be useful,
    but WITHOUT ANY WARRANTY; without even the implied warranty of
    MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.  See the
    GNU Affero General Public License for more details.

    You should have received a copy of the GNU Affero General Public License
    along with this program.  If not, see <https://www.gnu.org/licenses/>.
```

Also add information on how to contact you by electronic and paper mail.

If your software can interact with users remotely through a computer network, you should also make sure that it provides a way for users to get its source. For example, if your program is a web application, its interface could display a "Source" link that leads users to an archive of the code. There are many ways you could offer source, and different solutions will be better for different programs; see section 13 for the specific requirements.

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary. For more information on this, and how to apply and follow the GNU AGPL, see <https://www.gnu.org/licenses/>.

Copyright notice above.

19
20    Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
21    Everyone is permitted to copy and distribute verbatim copies
22    of this license document, but changing it is not allowed.
23
24                               Preamble
25
26      The GNU Affero General Public License is a free, copyleft license
27    for software and other kinds of works, specifically designed to ensure
28    cooperation with the community in the case of network server software.
29
30      The licenses for most software and other practical works are
31    designed to take away your freedom to share and change the works.  By
32    contrast, our General Public Licenses are intended to guarantee your
33    freedom to share and change all versions of a program--to make sure it
34    remains free software for all its users.
35
36      When we speak of free software, we are referring to freedom, not
37    price.  Our General Public Licenses are designed to make sure that you
38    have the freedom to distribute copies of free software (and charge for
39    them if you wish), that you receive source code or can get it if you
40    want it, that you can change the software or use pieces of it in new
41    free programs, and that you know you can do these things.
42
43      Developers that use our General Public Licenses protect your rights
44    with two steps: (1) assert copyright on the software, and (2) offer
45    you this License which gives you legal permission to copy, distribute
46    and/or modify the software.
47
48      A secondary benefit of defending all users' freedom is that
49    improvements made in alternate versions of the program, if they
50    receive widespread use, become available for other developers to
51    incorporate.  Many developers of free software are heartened and
52    encouraged by the resulting cooperation.  However, in the case of
53    software used on network servers, this result may fail to come about.
54    The GNU General Public License permits making a modified version and
55    letting the public access it on a server without ever releasing its
56    source code to the public.
57
58      The GNU Affero General Public License is designed specifically to
59    ensure that, in such cases, the modified source code becomes available
60    to the community.  It requires the operator of a network server to
61    provide the source code of the modified version running there to the
62    users of that server.  Therefore, public use of a modified version, on
63    a publicly accessible server, gives the public access to the source
64    code of the modified version.
```

```
 65
 66    An older license, called the Affero General Public License and
 67    published by Affero, was designed to accomplish similar goals.  This is
 68    a different license, not a version of the Affero GPL, but Affero has
 69    released a new version of the Affero GPL which permits relicensing under
 70    this license.
 71
 72    The precise terms and conditions for copying, distribution and
 73    modification follow.
 74
 75                        TERMS AND CONDITIONS
 76
 77    0. Definitions.
 78
 79    "This License" refers to version 3 of the GNU Affero General Public
 80    License.
 81
 82    "Copyright" also means copyright-like laws that apply to other kinds
 83    of works, such as semiconductor masks.
 84
 85    "The Program" refers to any copyrightable work licensed under this
 86    License.  Each licensee is addressed as "you".  "Licensees" and
 87    "recipients" may be individuals or organizations.
 88
 89    To "modify" a work means to copy from or adapt all or part of the work
 90    in a fashion requiring copyright permission, other than the making of an
 91    exact copy.  The resulting work is called a "modified version" of the
 92    earlier work or a work "based on" the earlier work.
 93
 94    A "covered work" means either the unmodified Program or a work based
 95    on the Program.
 96
 97    To "propagate" a work means to do anything with it that, without
 98    permission, would make you directly or secondarily liable for
 99    infringement under applicable copyright law, except executing it on a
100    computer or modifying a private copy.  Propagation includes copying,
101    distribution (with or without modification), making available to the
102    public, and in some countries other activities as well.
103
104    To "convey" a work means any kind of propagation that enables other
105    parties to make or receive copies.  Mere interaction with a user through
106    a computer network, with no transfer of a copy, is not conveying.
107
108    An interactive user interface displays "Appropriate Legal Notices"
109    to the extent that it includes a convenient and prominently visible
110    feature that (1) displays an appropriate copyright notice, and (2)
111    tells the user that there is no warranty for the work (except to the
112    extent that warranties are provided), that licensees may convey the
```

113   work under this License, and how to view a copy of this License. If
114   the interface presents a list of user commands or options, such as a
115   menu, a prominent item in the list meets this criterion.
116
117   1. Source Code.
118
119   The "source code" for a work means the preferred form of the work
120   for making modifications to it. "Object code" means any non-source
121   form of a work.
122
123   A "Standard Interface" means an interface that either is an official
124   standard defined by a recognized standards body, or, in the case of
125   interfaces specified for a particular programming language, one that
126   is widely used among developers working in that language.
127
128   The "System Libraries" of an executable work include anything, other
129   than the work as a whole, that (a) is included in the normal form of
130   packaging a Major Component, but which is not part of that Major
131   Component, and (b) serves only to enable use of the work with that
132   Major Component, or to implement a Standard Interface for which an
133   implementation is available to the public in source code form. A
134   "Major Component", in this context, means a major essential component
135   (kernel, window system, and so on) of the specific operating system
136   (if any) on which the executable work runs, or a compiler used to
137   produce the work, or an object code interpreter used to run it.
138
139   The "Corresponding Source" for a work in object code form means all
140   the source code needed to generate, install, and (for an executable
141   work) run the object code and to modify the work, including scripts to
142   control those activities. However, it does not include the work's
143   System Libraries, or general-purpose tools or generally available free
144   programs which are used unmodified in performing those activities but
145   which are not part of the work. For example, Corresponding Source
146   includes interface definition files associated with source files for
147   the work, and the source code for shared libraries and dynamically
148   linked subprograms that the work is specifically designed to require,
149   such as by intimate data communication or control flow between those
150   subprograms and other parts of the work.
151
152   The Corresponding Source need not include anything that users
153   can regenerate automatically from other parts of the Corresponding
154   Source.
155
156   The Corresponding Source for a work in source code form is that
157   same work.
158
159   2. Basic Permissions.
160

161 All rights granted under this License are granted for the term of
162 copyright on the Program, and are irrevocable provided the stated
163 conditions are met. This License explicitly affirms your unlimited
164 permission to run the unmodified Program. The output from running a
165 covered work is covered by this License only if the output, given its
166 content, constitutes a covered work. This License acknowledges your
167 rights of fair use or other equivalent, as provided by copyright law.
168
169 You may make, run and propagate covered works that you do not
170 convey, without conditions so long as your license otherwise remains
171 in force. You may convey covered works to others for the sole purpose
172 of having them make modifications exclusively for you, or provide you
173 with facilities for running those works, provided that you comply with
174 the terms of this License in conveying all material for which you do
175 not control copyright. Those thus making or running the covered works
176 for you must do so exclusively on your behalf, under your direction
177 and control, on terms that prohibit them from making any copies of
178 your copyrighted material outside their relationship with you.
179
180 Conveying under any other circumstances is permitted solely under
181 the conditions stated below. Sublicensing is not allowed; section 10
182 makes it unnecessary.
183
184 3. Protecting Users' Legal Rights From Anti-Circumvention Law.
185
186 No covered work shall be deemed part of an effective technological
187 measure under any applicable law fulfilling obligations under article
188 11 of the WIPO copyright treaty adopted on 20 December 1996, or
189 similar laws prohibiting or restricting circumvention of such
190 measures.
191
192 When you convey a covered work, you waive any legal power to forbid
193 circumvention of technological measures to the extent such circumvention
194 is effected by exercising rights under this License with respect to
195 the covered work, and you disclaim any intention to limit operation or
196 modification of the work as a means of enforcing, against the work's
197 users, your or third parties' legal rights to forbid circumvention of
198 technological measures.
199
200 4. Conveying Verbatim Copies.
201
202 You may convey verbatim copies of the Program's source code as you
203 receive it, in any medium, provided that you conspicuously and
204 appropriately publish on each copy an appropriate copyright notice;
205 keep intact all notices stating that this License and any
206 non-permissive terms added in accord with section 7 apply to the code;
207 keep intact all notices of the absence of any warranty; and give all
208 recipients a copy of this License along with the Program.

209

210   You may charge any price or no price for each copy that you convey,
211   and you may offer support or warranty protection for a fee.

212

213   5. Conveying Modified Source Versions.

214

215   You may convey a work based on the Program, or the modifications to
216   produce it from the Program, in the form of source code under the
217   terms of section 4, provided that you also meet all of these conditions:

218

219   a) The work must carry prominent notices stating that you modified
220   it, and giving a relevant date.

221

222   b) The work must carry prominent notices stating that it is
223   released under this License and any conditions added under section
224   7. This requirement modifies the requirement in section 4 to
225   "keep intact all notices".

226

227   c) You must license the entire work, as a whole, under this
228   License to anyone who comes into possession of a copy. This
229   License will therefore apply, along with any applicable section 7
230   additional terms, to the whole of the work, and all its parts,
231   regardless of how they are packaged. This License gives no
232   permission to license the work in any other way, but it does not
233   invalidate such permission if you have separately received it.

234

235   d) If the work has interactive user interfaces, each must display
236   Appropriate Legal Notices; however, if the Program has interactive
237   interfaces that do not display Appropriate Legal Notices, your
238   work need not make them do so.

239

240   A compilation of a covered work with other separate and independent
241   works, which are not by their nature extensions of the covered work,
242   and which are not combined with it such as to form a larger program,
243   in or on a volume of a storage or distribution medium, is called an
244   "aggregate" if the compilation and its resulting copyright are not
245   used to limit the access or legal rights of the compilation's users
246   beyond what the individual works permit. Inclusion of a covered work
247   in an aggregate does not cause this License to apply to the other
248   parts of the aggregate.

249

250   6. Conveying Non-Source Forms.

251

252   You may convey a covered work in object code form under the terms
253   of sections 4 and 5, provided that you also convey the
254   machine-readable Corresponding Source under the terms of this License,
255   in one of these ways:

256

257   a) Convey the object code in, or embodied in, a physical product
258   (including a physical distribution medium), accompanied by the
259   Corresponding Source fixed on a durable physical medium
260   customarily used for software interchange.
261
262   b) Convey the object code in, or embodied in, a physical product
263   (including a physical distribution medium), accompanied by a
264   written offer, valid for at least three years and valid for as
265   long as you offer spare parts or customer support for that product
266   model, to give anyone who possesses the object code either (1) a
267   copy of the Corresponding Source for all the software in the
268   product that is covered by this License, on a durable physical
269   medium customarily used for software interchange, for a price no
270   more than your reasonable cost of physically performing this
271   conveying of source, or (2) access to copy the
272   Corresponding Source from a network server at no charge.
273
274   c) Convey individual copies of the object code with a copy of the
275   written offer to provide the Corresponding Source. This
276   alternative is allowed only occasionally and noncommercially, and
277   only if you received the object code with such an offer, in accord
278   with subsection 6b.
279
280   d) Convey the object code by offering access from a designated
281   place (gratis or for a charge), and offer equivalent access to the
282   Corresponding Source in the same way through the same place at no
283   further charge. You need not require recipients to copy the
284   Corresponding Source along with the object code. If the place to
285   copy the object code is a network server, the Corresponding Source
286   may be on a different server (operated by you or a third party)
287   that supports equivalent copying facilities, provided you maintain
288   clear directions next to the object code saying where to find the
289   Corresponding Source. Regardless of what server hosts the
290   Corresponding Source, you remain obligated to ensure that it is
291   available for as long as needed to satisfy these requirements.
292
293   e) Convey the object code using peer-to-peer transmission, provided
294   you inform other peers where the object code and Corresponding
295   Source of the work are being offered to the general public at no
296   charge under subsection 6d.
297
298   A separable portion of the object code, whose source code is excluded
299 from the Corresponding Source as a System Library, need not be
300 included in conveying the object code work.
301
302   A "User Product" is either (1) a "consumer product", which means any
303 tangible personal property which is normally used for personal, family,
304 or household purposes, or (2) anything designed or sold for incorporation

```
305   into a dwelling.  In determining whether a product is a consumer product,
306   doubtful cases shall be resolved in favor of coverage.  For a particular
307   product received by a particular user, "normally used" refers to a
308   typical or common use of that class of product, regardless of the status
309   of the particular user or of the way in which the particular user
310   actually uses, or expects or is expected to use, the product.  A product
311   is a consumer product regardless of whether the product has substantial
312   commercial, industrial or non-consumer uses, unless such uses represent
313   the only significant mode of use of the product.
314
315     "Installation Information" for a User Product means any methods,
316   procedures, authorization keys, or other information required to install
317   and execute modified versions of a covered work in that User Product from
318   a modified version of its Corresponding Source.  The information must
319   suffice to ensure that the continued functioning of the modified object
320   code is in no case prevented or interfered with solely because
321   modification has been made.
322
323     If you convey an object code work under this section in, or with, or
324   specifically for use in, a User Product, and the conveying occurs as
325   part of a transaction in which the right of possession and use of the
326   User Product is transferred to the recipient in perpetuity or for a
327   fixed term (regardless of how the transaction is characterized), the
328   Corresponding Source conveyed under this section must be accompanied
329   by the Installation Information.  But this requirement does not apply
330   if neither you nor any third party retains the ability to install
331   modified object code on the User Product (for example, the work has
332   been installed in ROM).
333
334     The requirement to provide Installation Information does not include a
335   requirement to continue to provide support service, warranty, or updates
336   for a work that has been modified or installed by the recipient, or for
337   the User Product in which it has been modified or installed.  Access to a
338   network may be denied when the modification itself materially and
339   adversely affects the operation of the network or violates the rules and
340   protocols for communication across the network.
341
342     Corresponding Source conveyed, and Installation Information provided,
343   in accord with this section must be in a format that is publicly
344   documented (and with an implementation available to the public in
345   source code form), and must require no special password or key for
346   unpacking, reading or copying.
347
348     7. Additional Terms.
349
350     "Additional permissions" are terms that supplement the terms of this
351   License by making exceptions from one or more of its conditions.
352   Additional permissions that are applicable to the entire Program shall
```

353   be treated as though they were included in this License, to the extent
354   that they are valid under applicable law. If additional permissions
355   apply only to part of the Program, that part may be used separately
356   under those permissions, but the entire Program remains governed by
357   this License without regard to the additional permissions.
358
359   When you convey a copy of a covered work, you may at your option
360   remove any additional permissions from that copy, or from any part of
361   it. (Additional permissions may be written to require their own
362   removal in certain cases when you modify the work.) You may place
363   additional permissions on material, added by you to a covered work,
364   for which you have or can give appropriate copyright permission.
365
366   Notwithstanding any other provision of this License, for material you
367   add to a covered work, you may (if authorized by the copyright holders of
368   that material) supplement the terms of this License with terms:
369
370   a) Disclaiming warranty or limiting liability differently from the
371   terms of sections 15 and 16 of this License; or
372
373   b) Requiring preservation of specified reasonable legal notices or
374   author attributions in that material or in the Appropriate Legal
375   Notices displayed by works containing it; or
376
377   c) Prohibiting misrepresentation of the origin of that material, or
378   requiring that modified versions of such material be marked in
379   reasonable ways as different from the original version; or
380
381   d) Limiting the use for publicity purposes of names of licensors or
382   authors of the material; or
383
384   e) Declining to grant rights under trademark law for use of some
385   trade names, trademarks, or service marks; or
386
387   f) Requiring indemnification of licensors and authors of that
388   material by anyone who conveys the material (or modified versions of
389   it) with contractual assumptions of liability to the recipient, for
390   any liability that these contractual assumptions directly impose on
391   those licensors and authors.
392
393   All other non-permissive additional terms are considered "further
394   restrictions" within the meaning of section 10. If the Program as you
395   received it, or any part of it, contains a notice stating that it is
396   governed by this License along with a term that is a further restriction,
397   you may remove that term. If a license document contains a further
398   restriction but permits relicensing or conveying under this License, you
399   may add to a covered work material governed by the terms of that license
400   document, provided that the further restriction does not survive such

401 relicensing or conveying.
402
403   If you add terms to a covered work in accord with this section, you
404 must place, in the relevant source files, a statement of the
405 additional terms that apply to those files, or a notice indicating
406 where to find the applicable terms.
407
408   Additional terms, permissive or non-permissive, may be stated in the
409 form of a separately written license, or stated as exceptions;
410 the above requirements apply either way.
411
412   8. Termination.
413
414   You may not propagate or modify a covered work except as expressly
415 provided under this License. Any attempt otherwise to propagate or
416 modify it is void, and will automatically terminate your rights under
417 this License (including any patent licenses granted under the third
418 paragraph of section 11).
419
420   However, if you cease all violation of this License, then your
421 license from a particular copyright holder is reinstated (a)
422 provisionally, unless and until the copyright holder explicitly and
423 finally terminates your license, and (b) permanently, if the copyright
424 holder fails to notify you of the violation by some reasonable means
425 prior to 60 days after the cessation.
426
427   Moreover, your license from a particular copyright holder is
428 reinstated permanently if the copyright holder notifies you of the
429 violation by some reasonable means, this is the first time you have
430 received notice of violation of this License (for any work) from that
431 copyright holder, and you cure the violation prior to 30 days after
432 your receipt of the notice.
433
434   Termination of your rights under this section does not terminate the
435 licenses of parties who have received copies or rights from you under
436 this License. If your rights have been terminated and not permanently
437 reinstated, you do not qualify to receive new licenses for the same
438 material under section 10.
439
440   9. Acceptance Not Required for Having Copies.
441
442   You are not required to accept this License in order to receive or
443 run a copy of the Program. Ancillary propagation of a covered work
444 occurring solely as a consequence of using peer-to-peer transmission
445 to receive a copy likewise does not require acceptance. However,
446 nothing other than this License grants you permission to propagate or
447 modify any covered work. These actions infringe copyright if you do
448 not accept this License. Therefore, by modifying or propagating a

```
449       covered work, you indicate your acceptance of this License to do so.
450
451         10. Automatic Licensing of Downstream Recipients.
452
453         Each time you convey a covered work, the recipient automatically
454       receives a license from the original licensors, to run, modify and
455       propagate that work, subject to this License.  You are not responsible
456       for enforcing compliance by third parties with this License.
457
458         An "entity transaction" is a transaction transferring control of an
459       organization, or substantially all assets of one, or subdividing an
460       organization, or merging organizations.  If propagation of a covered
461       work results from an entity transaction, each party to that
462       transaction who receives a copy of the work also receives whatever
463       licenses to the work the party's predecessor in interest had or could
464       give under the previous paragraph, plus a right to possession of the
465       Corresponding Source of the work from the predecessor in interest, if
466       the predecessor has it or can get it with reasonable efforts.
467
468         You may not impose any further restrictions on the exercise of the
469       rights granted or affirmed under this License.  For example, you may
470       not impose a license fee, royalty, or other charge for exercise of
471       rights granted under this License, and you may not initiate litigation
472       (including a cross-claim or counterclaim in a lawsuit) alleging that
473       any patent claim is infringed by making, using, selling, offering for
474       sale, or importing the Program or any portion of it.
475
476         11. Patents.
477
478         A "contributor" is a copyright holder who authorizes use under this
479       License of the Program or a work on which the Program is based.  The
480       work thus licensed is called the contributor's "contributor version".
481
482         A contributor's "essential patent claims" are all patent claims
483       owned or controlled by the contributor, whether already acquired or
484       hereafter acquired, that would be infringed by some manner, permitted
485       by this License, of making, using, or selling its contributor version,
486       but do not include claims that would be infringed only as a
487       consequence of further modification of the contributor version.  For
488       purposes of this definition, "control" includes the right to grant
489       patent sublicenses in a manner consistent with the requirements of
490       this License.
491
492         Each contributor grants you a non-exclusive, worldwide, royalty-free
493       patent license under the contributor's essential patent claims, to
494       make, use, sell, offer for sale, import and otherwise run, modify and
495       propagate the contents of its contributor version.
496
```

neo4j/LICENSE.txt at 3.4 · neo4j/neo4j · GitHub

```
497     In the following three paragraphs, a "patent license" is any express
498   agreement or commitment, however denominated, not to enforce a patent
499   (such as an express permission to practice a patent or covenant not to
500   sue for patent infringement).  To "grant" such a patent license to a
501   party means to make such an agreement or commitment not to enforce a
502   patent against the party.
503
504     If you convey a covered work, knowingly relying on a patent license,
505   and the Corresponding Source of the work is not available for anyone
506   to copy, free of charge and under the terms of this License, through a
507   publicly available network server or other readily accessible means,
508   then you must either (1) cause the Corresponding Source to be so
509   available, or (2) arrange to deprive yourself of the benefit of the
510   patent license for this particular work, or (3) arrange, in a manner
511   consistent with the requirements of this License, to extend the patent
512   license to downstream recipients.  "Knowingly relying" means you have
513   actual knowledge that, but for the patent license, your conveying the
514   covered work in a country, or your recipient's use of the covered work
515   in a country, would infringe one or more identifiable patents in that
516   country that you have reason to believe are valid.
517
518     If, pursuant to or in connection with a single transaction or
519   arrangement, you convey, or propagate by procuring conveyance of, a
520   covered work, and grant a patent license to some of the parties
521   receiving the covered work authorizing them to use, propagate, modify
522   or convey a specific copy of the covered work, then the patent license
523   you grant is automatically extended to all recipients of the covered
524   work and works based on it.
525
526     A patent license is "discriminatory" if it does not include within
527   the scope of its coverage, prohibits the exercise of, or is
528   conditioned on the non-exercise of one or more of the rights that are
529   specifically granted under this License.  You may not convey a covered
530   work if you are a party to an arrangement with a third party that is
531   in the business of distributing software, under which you make payment
532   to the third party based on the extent of your activity of conveying
533   the work, and under which the third party grants, to any of the
534   parties who would receive the covered work from you, a discriminatory
535   patent license (a) in connection with copies of the covered work
536   conveyed by you (or copies made from those copies), or (b) primarily
537   for and in connection with specific products or compilations that
538   contain the covered work, unless you entered into that arrangement,
539   or that patent license was granted, prior to 28 March 2007.
540
541     Nothing in this License shall be construed as excluding or limiting
542   any implied license or other defenses to infringement that may
543   otherwise be available to you under applicable patent law.
544
```

```
545      12. No Surrender of Others' Freedom.
546
547      If conditions are imposed on you (whether by court order, agreement or
548   otherwise) that contradict the conditions of this License, they do not
549   excuse you from the conditions of this License.  If you cannot convey a
550   covered work so as to satisfy simultaneously your obligations under this
551   License and any other pertinent obligations, then as a consequence you may
552   not convey it at all.  For example, if you agree to terms that obligate you
553   to collect a royalty for further conveying from those to whom you convey
554   the Program, the only way you could satisfy both those terms and this
555   License would be to refrain entirely from conveying the Program.
556
557      13. Remote Network Interaction; Use with the GNU General Public License.
558
559      Notwithstanding any other provision of this License, if you modify the
560   Program, your modified version must prominently offer all users
561   interacting with it remotely through a computer network (if your version
562   supports such interaction) an opportunity to receive the Corresponding
563   Source of your version by providing access to the Corresponding Source
564   from a network server at no charge, through some standard or customary
565   means of facilitating copying of software.  This Corresponding Source
566   shall include the Corresponding Source for any work covered by version 3
567   of the GNU General Public License that is incorporated pursuant to the
568   following paragraph.
569
570      Notwithstanding any other provision of this License, you have permission
571   to link or combine any covered work with a work licensed under version 3
572   of the GNU General Public License into a single combined work, and to
573   convey the resulting work.  The terms of this License will continue to
574   apply to the part which is the covered work, but the work with which it is
575   combined will remain governed by version 3 of the GNU General Public
576   License.
577
578      14. Revised Versions of this License.
579
580      The Free Software Foundation may publish revised and/or new versions of
581   the GNU Affero General Public License from time to time.  Such new
582   versions will be similar in spirit to the present version, but may differ
583   in detail to address new problems or concerns.
584
585      Each version is given a distinguishing version number.  If the
586   Program specifies that a certain numbered version of the GNU Affero
587   General Public License "or any later version" applies to it, you have
588   the option of following the terms and conditions either of that
589   numbered version or of any later version published by the Free
590   Software Foundation.  If the Program does not specify a version number
591   of the GNU Affero General Public License, you may choose any version
592   ever published by the Free Software Foundation.
```

```
593
594     If the Program specifies that a proxy can decide which future
595   versions of the GNU Affero General Public License can be used, that
596   proxy's public statement of acceptance of a version permanently
597   authorizes you to choose that version for the Program.
598
599     Later license versions may give you additional or different
600   permissions.  However, no additional obligations are imposed on any
601   author or copyright holder as a result of your choosing to follow a
602   later version.
603
604     15. Disclaimer of Warranty.
605
606     THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY
607   APPLICABLE LAW.  EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT
608   HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY
609   OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,
610   THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
611   PURPOSE.  THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
612   IS WITH YOU.  SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF
613   ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
614
615     16. Limitation of Liability.
616
617     IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
618   WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS
619   THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
620   GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
621   USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF
622   DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD
623   PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
624   EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF
625   SUCH DAMAGES.
626
627     17. Interpretation of Sections 15 and 16.
628
629     If the disclaimer of warranty and limitation of liability provided
630   above cannot be given local legal effect according to their terms,
631   reviewing courts shall apply local law that most closely approximates
632   an absolute waiver of all civil liability in connection with the
633   Program, unless a warranty or assumption of liability accompanies a
634   copy of the Program in return for a fee.
635
636                      END OF TERMS AND CONDITIONS
637
638              How to Apply These Terms to Your New Programs
639
640     If you develop a new program, and you want it to be of the greatest
```

```
641   possible use to the public, the best way to achieve this is to make it
642   free software which everyone can redistribute and change under these terms.
643
644     To do so, attach the following notices to the program.  It is safest
645   to attach them to the start of each source file to most effectively
646   state the exclusion of warranty; and each file should have at least
647   the "copyright" line and a pointer to where the full notice is found.
648
649       <one line to give the program's name and a brief idea of what it does.>
650       Copyright (C) <year>  <name of author>
651
652       This program is free software: you can redistribute it and/or modify
653       it under the terms of the GNU Affero General Public License as
654       published by the Free Software Foundation, either version 3 of the
655       License, or (at your option) any later version.
656
657       This program is distributed in the hope that it will be useful,
658       but WITHOUT ANY WARRANTY; without even the implied warranty of
659       MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.  See the
660       GNU Affero General Public License for more details.
661
662       You should have received a copy of the GNU Affero General Public License
663       along with this program.  If not, see <http://www.gnu.org/licenses/>.
664
665   Also add information on how to contact you by electronic and paper mail.
666
667     If your software can interact with users remotely through a computer
668   network, you should also make sure that it provides a way for users to
669   get its source.  For example, if your program is a web application, its
670   interface could display a "Source" link that leads users to an archive
671   of the code.  There are many ways you could offer source, and different
672   solutions will be better for different programs; see section 13 for the
673   specific requirements.
674
675     You should also get your employer (if you work as a programmer) or school,
676   if any, to sign a "copyright disclaimer" for the program, if necessary.
677   For more information on this, and how to apply and follow the GNU AGPL, see
678   <http://www.gnu.org/licenses/>.
679
680
681   "Commons Clause" License Condition
682
683   The Software is provided to you by the Licensor under the License, as
684   defined below, subject to the following condition. Without limiting
685   other conditions in the License, the grant of rights under the License
686   will not include, and the License does not grant to you, the right to
687   Sell the Software.  For purposes of the foregoing, "Sell" means
688   practicing any or all of the rights granted to you under the License
```

```
689    to provide to third parties, for a fee or other consideration,
690    a product or service that consists, entirely or substantially,
691    of the Software or the functionality of the Software. Any license
692    notice or attribution required by the License must also include
693    this Commons Cause License Condition notice.
```
